REASONS FOR ALLOWANCE

1. Claims **10, 12, 14-15, and 17-18** are allowed.
2. The following is an Examiner's statement of reasons for allowance:
The cited prior arts taken alone or in combination fail to teach the claimed invention of the data classification apparatus and method adapted to high dimensional classification problems and provide a single measure of confidence that is valid under the independently and identically distributed assumption, as claimed by Applicants.
Specifically, independent claims 10, 14, 15, and 18 disclose using a specific formula to compute the measure of confidence mentioned above.
3. The closest prior arts of Hirotaka Mizuno (U. S. Patent No. 5,577,166, dated November 19, 1996; class 395; subclass 22) teaches a method and an apparatus for classifying an input pattern as a classification object by use of a neural network and transforming the input pattern into an output pattern as a result of classification, in view of Eiichi Tsuboka (U. S. Patent No. 5,608,841, dated March 4, 1997; class 395; subclass 2.65) teaches a method and apparatus for estimating parameters of a new hidden Markov model applicable to pattern recognition such as recognition of speech signals, in view of McDonough et al (U. S. Patent No. 5,625,748, dated April 29, 1997; class 395; subclass 2.6) teaches an improved topic discriminator using posterior probability, and in further view of Kulkarni et al "On the existence of strongly consistent rules for estimation and classification", IEEE (1995) teaches the necessary and sufficient conditions for the

existence of strongly consistent estimators for hypothesis testing. All of the above cited prior arts fail to teach or suggest each pair, of the example and classification, in the set is tested by the assay means to determine a single strangeness value valid under the independently and identically distributed assumption, computed according to the formula in claims 10, 14, 15, and 18. To the extent that this feature is not found in the prior art cited by Examiner, the present case is held allowable over the art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for allowance."
